

POWER. AT THE RIGHT MOMENT.

DIESEL GENERATORS

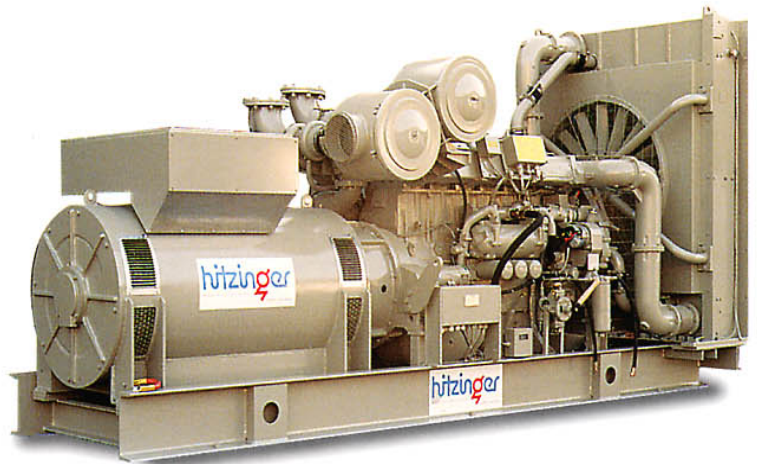

hitachi

HIGH STANDARD OF POWER SUPPLIES

No matter where and why you require electrical energy, we supply exactly the right generator. We provide you with the highest standard for continuous emergency and peak shaving supplies. For special applications we offer tailor made solutions and systems related to reduced exhaust emissions, sound-insulation, shock and vibration, EMI-compatibility, dimensions and weights.

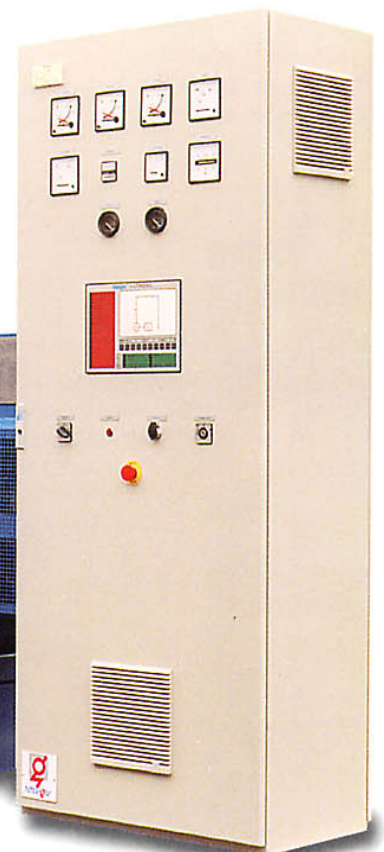

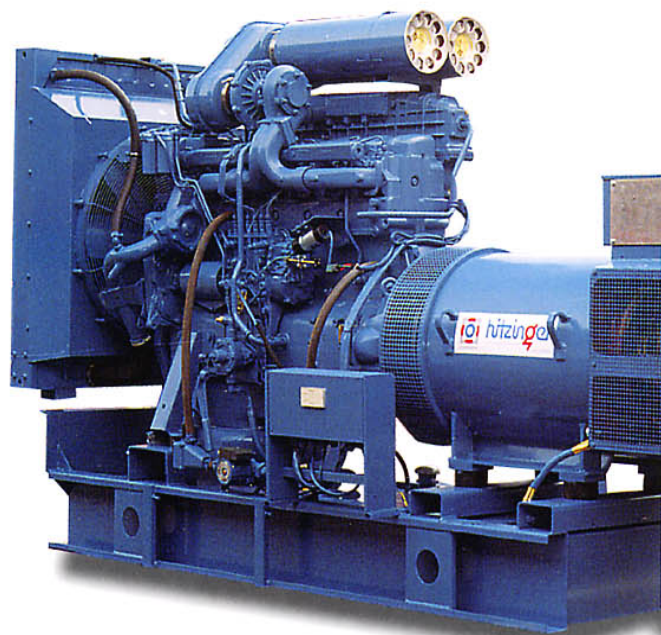

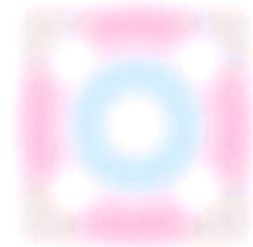

AUTOMATION

Controls and switch panels are individually tailored for the corresponding plant from simple emergency sets to complex units for parallel operation.

The HITZINGER philosophy offers systems for easy operation and wide communication possibilities.

Interfaces for Central processing supervision systems – Remote modem diagnosis – Operation and failure protocol with/without printer.

POWER. AT THE RIGHT MOMENT.

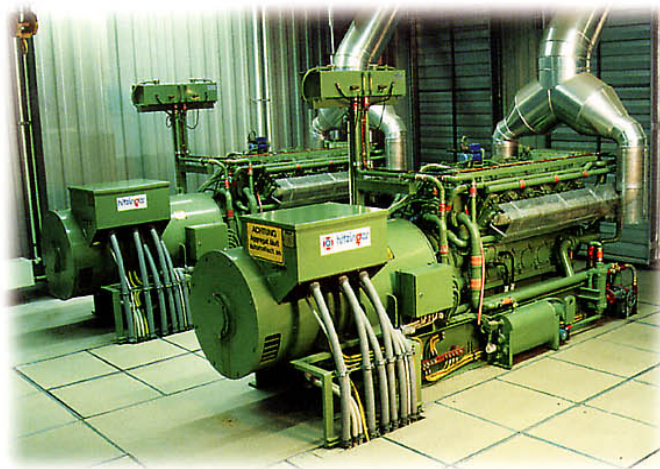

SYSTEMS

Basic Version:	Skid mounted gensets for stationary installation
Portable Version:	Gensets with a weather proof canopy for indoor and outdoor installation (Optional: Sound Insulation)
Containerized Version:	Gensets mounted in ISO-standard containers (Optional: Sound Insulation)
Mobile Version:	Gensets mounted on single or twin axle trailers with individual options like cable drums, etc. on request.

INDIVIDUAL SOLUTIONS

As specialists, we provide solutions, from design to installation. Based on our wealth of experience you can be assured of low costs and shortened lead times.

Our engineers are able to solve any of your problems. We are sure to find the optimal solution for your requirements, independent whether your problems lie in the field of exhaust emission, sound suppression, shock and vibration requirements.

WE OFFER YOU

- Diesel-petrol- and gas powered sets
- Rating 10–3000 kVA
- Voltages up to 1000 V
- Frequencies 50–400 Hz

DIESEL
GENERATORS

POWER. AT THE RIGHT MOMENT.

PRODUCTION AND SAFETY WITHOUT INTERRUPTION

Power cuts are not as rare as one might think. If machinery is at standstill profit will drop. With our generator you avoid expensive production losses. An autonomous electricity supply can quickly pay off.

SERVICES

- Engineering and Consulting
HITZINGER customers enjoy our wide experience in the field of engineering and system lay-out.
- Installation and Commissioning
Installation, Commissioning is carried out by our own experienced engineers or by our local partners.
- Documentation and spares back up.

MAINTENANCE

Proper maintenance is an essential requirement for the reliable operation of emergency systems and directly related to life time. HITZINGER service engineers are at customers disposal throughout the world.

REFERENZENZEN:

HITZINGER gensets are operating even under worst conditions in hospitals, P.T.T.-centres, industrial plants, public buildings, banks and

insurance companies and they supply power „since 1946 in many countries of the world“.
